

SETUP YOUR SECURE SSH GATEWAY IN 30 MINUTES !

Audited By

Integrates with

What is a ssh gateway or jump box?

"Its a intermediary Linux jump server, where all your linux system administrators, technical support staff would first login via ssh to reach the target linux nodes. The centralised management would improve security and help manage hundreds of Linux nodes better and faster."

Why Ezeelogin jump box?

- Organise and Manage hundreds of Linux nodes.
- Intuitive interface for fast ssh access
- Two factor authentication for ssh and web panel
- Record all ssh sessions
- Be PCI Compliant
- Hosted on your servers.
- Control access of sys-admins
- Root access without root password
- Password manger for webportals
- Execute command in parallel
- Filter dangerous commands
- Quickly access details of all servers
- Reset root passwords quickly
- Set strong root passwords
- Automatic su and sudo
- Master-Slave for high availability

Testimonials

- Patrick Sanders | www.040hosting.eu

“ We do like the software very much and believe it has a huge potential, no hosting company with multiple servers should go without it. It certainly does as advertised. I love it! ”

- Michael Brunner | CTO, NovaTrend Services GmbH

- Richard K | KodoHost.com

“ I am so Glad I found ezeelogin. I own a small hosting firm with over 70 servers. Ezeelogin is amazingly handy and has reduced our response time in handling server issues and allowed our employees to be more productive. It would be hard to imagine life without ezeelogin! ”

“ ServerOrigin Communications (www.serverorigin.com) specializes in managed Enterprise-Grade denial-of-service mitigation and hosting. ServerOrigin's ethProxy solutions serve more than 1,000,000 domains in 180 countries. Our team manages ... Read whole ”

- Kevin Hatfield | CEO, serverorigin.com

“ With the growing amount of servers it was harder and harder to manage our servers. With Ezeelogin we found a perfect solution to cut down the time we need to manage our servers. Because of the amazing support we were able to setup and configure ezeelogin in a very short time. ”
